

## Peak 2020

### Water Team Coordinator

#### Role Description

##### **Role:**

To advise and supply the camp with the essential camp services as required for the provision of Water. To organise and be responsible for the smooth running of the Water Team

##### **Reporting to:**

The Site Services Manager

##### **Responsibilities:**

##### **Mission and Policies**

Ensure that the Peak 2020 Mission and Policies are successfully implemented in the areas covered by the role. Ensure that all staff members are adequately trained to enable them to undertake their duties. Ensure that the correct numbers of suitably qualified staff are recruited to ensure that the camp is fully compliant with current health and safety legislation.

In conjunction with the Site Services Director and Site Services Manager:

Plan, acquire and install the means of supplying the camp with water throughout the site. Liaise with the appropriate authorities as necessary and to ensure access to the appropriate "water take off points"

Plan for and install sufficient water pipes to supply the whole camp. Liaise with other teams as necessary to understand their requirements.

Liaise and arrange with a suitable contractor to carry out all tests on the water chlorination prior to camp

Liaise closely with The Electrics and Waste teams as necessary to understand their requirements.

Ensure all water/ toilet installations are completed for the inspection prior to start of camp by the local authorities and other bodies (deadline to be set)

Ensure that the Water Team has a technical support person / team available 24 hours a day throughout the camp to deal with any emergencies.

The plans for the supply of water should take into account the requirements of special needs campers and any specialist equipment needed for the camp safety team and fire team.

Plan for and provide the necessary water insulation to the toilet and essential shower provision for the camp. This provision should include any additional requirements for visitors and for Junior Peak.

Plan for and provide the necessary water insulation to Portable cabins, Marquees and Catering outlets as requested by team managers.

In conjunction with the Site Services Director and the Site Services Manager, liaise with the Local Heath Authority, Derbyshire Dales District Council to ensure their agreement with the planned facilities.

In conjunction with the Site Services Manager, work with a contractor and appropriate authorities for the disposal of all waste and effluent from the camp. Have a contingency plan for the supply of additional toilet facilities if required.

### **Post Camp**

Remove and dismantle all water installations, arrange storage of Peak equipment and leave the site completely clear of all items ready to hand the site back to Chatsworth.

### **Risk Assessment:**

Ensure that a full risk assessment takes place within the team / activities, and sub-contractors to ensure that all Safety and Security requirements are fulfilled in line with Peak Camps and the association's guidelines.

### **August 2018**
